

I am a truck driver going in and out of Canada, three times a week, by way of Port Huron - Bluewater bridge or Windsor's Ambassador bridge. I depend on the traffic and weather reports on these two areas to decide which way to go out. XM Radio is important to the millions of truck drivers out there. We don't have the leisure of watching television and it is wonderful to finally have a service that doesn't fade. It is worth the money I spend monthly on this. Please help to protect this service in full for all of us that keep America going..
